2. Claims 17-45 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 7/26/2007.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 46 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 46 is dependent upon a non-elected claim and as such is indefinite. Claim 46 should be rewritten in independent form to include all of the limitations set forth in claim 17.

Claim Objections

4. Claim 14 is objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from any other multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claim has not been further treated on the merits.

Claim Rejections - 35 USC § 102/103

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all

obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-16 and 46 are rejected under 35 U.S.C. 102(b) as being anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Lecomte (EP 0 304 351 A1). A machine translation will be relied upon for this rejection.

a. Lecomte discloses a flexible material that has a metallic decorative layer applied to it. The flexible base material is a textile and is made of polyester and maybe a knitted interlock of 28 gauge. On top of the polyester a layer of polyurethane resin is applied followed by a layer of plated silver.

b. Although Lecomte does not explicitly teach the claimed feature changeable appearance due to stretching that is reversible, it is reasonable to presume that said property is inherent to Lecomte. Support for said presumption is found in the use of like materials (i.e. polyester knitted fabric with metallic coating). The burden is upon Applicant to prove otherwise. *In re Fitzgerald* 205 USPQ 594. In addition, the presently claimed property of changeable appearance due to stretching that is reversible would

obviously have been present once the Lecomte product is provided. The remaining claimed aesthetic properties would necessarily be present in the invention of Lecomte because a knitted polyester textile is inherently reversibly stretchable as long as the fibers of the textile are not detrimentally damaged. The claimed metallic foil layer is anticipated by Lecomte and would perform in the claimed manner because the composition and structure of claimed invention is provided.
